F+ Trading hours Pg. 1 , Christmas with Kincrome Pg. 2

Setting your summer fallow up for success

Now that we have had a bit of rain (some have had a lot!) around the district it is time to think about your summer fallow weed control. Getting a residual down with your knockdown will extend the life of your weed control. Residual options to stop weeds growing for a few months:

1. Flame/Bonfire/Spark (imazapic) - great for long term control of grass weeds. Only use if you are going to plant Imi tolerant barley. It is a really good cheap option.
2. Balance/Bounty (isoxaflutole) - also good for grass weed control. Can use ahead of all cereal and chickpea crops.
3. Terrain Flow/Valor (flumioxazin) - use for residual control of both grass and broadleaf weeds. Needs rain to activate it, and check your water pH! Very short plant back restrictions to most crops, so a good choice if you need to top up in January.
4. Dual Gold (s-metolachlor) - grass weed control in fallow or ahead of sorghum
5. Terbyne (terbuthylazine) - broadleaf weed control in fallow or ahead of sorghum. Very flexible plantback options for both cereals and legume crops.
6. Picoflex (picloram) - this a component of 75D, it gives very good control of broadleaf weeds. Not for use ahead of any legume crop.

Christmas trading hours Condamine Seeds and Tyres

Wednesday 24th 8am-12:30pm OPEN
Thursday 25th CLOSED
Friday 26th CLOSED
Saturday 27th CLOSED
Sunday 28th CLOSED
